The State of Queensland comprises the north-eastern portion of the Continent of Australia—its northern extremity on the mainland is Cape York, and its southern (on the coast) Point Danger. The one hundred and thirty-eighth degree of longitude is its boundary on the west.

The Area of the State is 668,497 square miles, and its seaboard extends 2,250 miles.

The State is divided into sixty-one Electorates, fifty Districts each returning one member, and eleven Districts each returning two members. It had four Cities, twenty-nine Municipal Towns, and upwards of two hundred small Towns or Townships. There are also Shire Councils charged with the construction and maintenance of public highways and other necessary public works within their boundaries.

From the returns of the Census of 1901, it appears that, out of the entire population, 330,144 were Australasian born (of whom 289,531 were born in the State, including 5,137 civilised aborigines); 68,589 were born in England and Wales, 37,636 in Ireland, 19,934 in Scotland, and 13,163 in Germany.

There were only 4,625 persons returned as suffering from sickness and accident, being at the rate of 9·19 in every 1,000 persons.

The following are the rates of increase during the intervals between each Census :—

* Excess of departures over arrivals, including allowance for unrecorded arrivals and departures.

† Since 1866, increasing areas of land have been alienated by private sale or selection. The aggregate area and amount received for land alienated in fee-simple to the end of 1883 was 6,911,577 acres; £4,518,224.

‡ Live Stock Borderwise included for the first time.

¶ From 1883 number and tonnage of vessels calling at more than one port in Queensland during same voyage only counted once.

†† The total yield of gold to end of 1877 has been estimated by the Mines Department at 2,646,916 oz., which is 999,905 oz. more than the quantity shown as sent by escort during the same period: the amount sent by escort was always known to be short of the actual production, and the discrepancy increased as railways to the interior were completed, but prior to 1878 there were no other means of forming an estimate.

a Including amount due on account of Treasury Notes.

Scales for Calculating Quantity of Excisable Goods Produced from Material.

33. The quantities of excisable goods produced from a given quantity of material shall be calculated, as far as relates to the manufacture of sugar from cane, according to the following scale:—

From each of the following quantities of cane ground, crushed, or treated in his factory, a manufacturer shall be deemed to have produced 1 ton of 2,240 lb. of raw sugar, namely:—

In No. 1 District ...	9·50 tons of cane
In No. 2 District ...	10 tons of cane
In No. 3 District ...	11 tons of cane
In No. 4 District ...	12 tons of cane.

For each 2,050 gallons of clarified cane-juice calculated to a standard density of 7° Baumè saccharometer and at a temperature of 80° Fahr., the manufacturer shall be deemed to have manufactured 1 ton of 2,240 lb. of raw sugar.

For each 100 tons of raw sugar manufactured into refined sugar, the manufacturer shall be deemed to have manufactured 94 tons of refined sugar.

DISTRICTS.

The bounty is intended to be at the rate of Two pounds for every ton of the sugar-giving contents of the cane, and the average sugar-giving contents of cane in the following districts shall be taken to be the sugar-giving contents of each lot of cane in such districts respectively, namely:—

"No. 1 District," comprising all that part of Australia north of the 19th degree of south latitude.

Vessels in ballast, or departing to sea laden with coal only, shall pay half pilotage, and

Vessels putting into or returning to port from stress of weather, or other sufficient cause, and not landing or taking on board passengers or cargo, shall pay half the said rates, and should any such vessel, when putting into or returning to port as aforesaid and after making the proper signal, be unable from any cause to obtain the services of a pilot, and be compelled to enter such port without a pilot, she shall pay no pilotage dues for such entry into port.

Any foreign or intercolonial vessel, the master of which is not exempt from pilotage, shall, if cleared for more than one port in Queensland, pay one pilotage rate of eightpence per ton at the first port entered, and one pilotage rate of fourpence at the second port of entry, but shall not be required to pay any further pilotage at any other port included in her original clearance.

Every vessel not exempt from pilotage, and every vessel employing the services of a pilot for berthing or removal, or on board of which the harbour master or his deputy shall proceed for the purpose of berthing or removal (such removal not being for the purpose of leaving the port), shall pay the dues set forth in the following schedule:—

46 Vic., No. 12. (10 Oct., 1882.)

Every vessel of fifteen tons and upwards trading within any port in Queensland shall, once in the month of January and once in the month of July in each year, pay the highest pilotage.

Every intercolonial vessel commanded by a master holding from the Board a certificate of exemption from pilotage for any port, such certificate being applicable to the vessel and the voyage upon which she is engaged, shall pay, once in every month in which she enters such port, a harbour rate of sixpence per ton.

Every coaster commanded by a master holding from the Board a certificate of exemption from pilotage for any port, such certificate being applicable to the vessel and the voyage upon which she is engaged, shall pay, once in every month in which she enters such port, a harbour rate of fourpence per ton.

Every coaster under fifty tons shall pay, once in every month in which she enters any port, a harbour rate of twopence per ton.

All rates and dues are payable to the Chief Officer of Customs at the port where the same are levied, or if there be no officer of Customs then to the pilot.

After payment of one such rate at any port such coaster shall not be liable during such month to any further dues at any other port, except pilotage when a pilot is actually engaged.

Vessels whose original port of clearance and final port of discharge are not within the colony, calling at any Queensland port, but not carrying cargo coastwise, shall be exempt from the payment of pilotage rates, but shall pay, on all passengers and cargo landed or shipped, the undermentioned dues, that is to say—

INCOME TAX, DIVIDEND DUTY, AND TOTALISATOR TAX.

Authority under which Levied.	Specification of Taxes, Duties, &c.
	INCOME TAX.
2 Edw. VII., No. 10. (1 Dec., 1902.)	*Income within the meaning of the Act only includes income either from personal exertion or the produce of property earned in or derived from Queensland.*
	7. (i.) If the total income subject to the tax does not in the aggregate exceed one hundred pounds, the fixed sum of ten shillings ;
	(ii.) If the total income subject to the tax exceeds one hundred pounds, but does not exceed one hundred and fifty pounds, the fixed sum of one pound ;
	(iii.) If the total income subject to the tax does in the aggregate exceed one hundred and fifty pounds, on the first one hundred and fifty pounds of such income the fixed sum of one pound; and in estimating such one hundred and fifty pounds the income, if any, derived from the produce of property shall be first resorted to ;
	On the balance of the total income after the first one hundred and fifty pounds :
	(*a*) On all income derived from personal exertion at the rate of sixpence for every one pound of such income ;
	(*b*) On all other income derived from the produce of property at the rate of one shilling for every one pound of such income;
	Provided that the least amount of income tax payable by any taxpayer for any year shall be the sum of ten shillings.
	8. Subject to this Act, every male person of the age of twenty-one years and upwards and every company shall be chargeable with and liable to pay income tax :
	Provided that no female of whatever age, and whether married or unmarried, shall be subject to taxation under this Act unless having an income amounting in the aggregate to one hundred and fifty pounds or upwards ; and no male person under the age of twenty-one years, unless having an income amounting in the aggregate to one hundred and fifty pounds or upwards, shall be chargeable with or liable to pay income tax.
	31. The income of foreign companies shall be assessed as follows :—
	(i.) If the company carries on in Queensland the business of banking and no other business whatsoever, its income shall be a sum which bears the same proportion to the total profits of the company as the amount of its assets and liabilities in Queensland bears to its total assets and liabilities ;
	(ii.) If the company carries on in Queensland fire, accident, fidelity, guarantee, or marine insurance business, its income shall be a sum equal to twenty-five pounds per centum of the premiums on account of Queensland business received by the company after deducting any portion of such premiums actually paid away by way of reinsurance effected in Queensland with any other company ;
	(iii.) If the company is not a mutual life assurance company, and carries on in Queensland life assurance business, its income shall be a sum equal to twenty pounds per centum of the premiums on account of Queensland business received by the company ;
	(iv.) If the company carries on in Queensland mercantile business, its income shall be the profits made by such company on its Queensland business. If such profits cannot, in the opinion of the Commissioner, be otherwise satisfactorily determined, such profits may be assessed by the Commissioner at a sum equal to three pounds per centum of the total amount of sales made by the company in Queensland ;
	(v.) The income of any other foreign company liable to assessment under this Act shall be the amount of the profits made by the company on its business in Queensland. If such profits cannot, in the opinion of the Commissioner, be otherwise satisfactorily determined, such profits may be assessed by the Commissioner at a sum equal to three pounds per centum of the capital employed by the company in carrying on its business in Queensland.
	INCOME TAX—*continued.*
2 Edw. VII., No. 10. (1 Dec., 1902.)	32. (1.) When a foreign company or an absentee, herein termed "the principal," by means of a company registered in Queensland or carrying on business therein or by means of any person in Queensland, herein termed "the agent," sells or disposes of any property in Queensland for the principal, whether the moneys arising therefrom are paid to or received by the principal directly or otherwise, the taxable amount of the income derived therefrom by the principal shall, if such income cannot in the opinion of the Commissioner be otherwise satisfactorily determined, be assessed at an amount equal to five pounds per centum upon the net amount for which such property has been sold or disposed of after taking into consideration any mortgage thereon.
	In every case the amount assessed shall for the purposes of obtaining income tax be deemed to be income derived by the agent.
	(2.) The agent shall as regards such income make the returns, be assessed, be liable to income tax, and otherwise be subject to the provisions of this Act, and to do all acts and things thereunder as if such income were actually the income of the agent.
	But nothing herein contained shall exempt or discharge the principal from liability to pay income tax upon such income.
	33. (1.) When a foreign company or person whose principal place of business is out of Queensland, either as owner or charterer of any vessel carries passengers, live stock, mails, or goods shipped in Queensland, such company or person shall, by itself or himself or its or his agent or other representative in Queensland, within the prescribed time, make a return of the full amount payable to it or to him, whether such amount is payable in Queensland or beyond Queensland, in respect of the carriage of such passengers, live stock, mails, and goods as required or provided by the terms under which the same are carried or agreed to be carried to the port of discharge.
	Such company, person, agent, or representative shall be assessed thereon, and the taxable amount of the income derived therefrom shall, if such income cannot in the opinion of the Commissioner be otherwise satisfactorily determined, be assessed at an amount equal to three pounds in every one hundred pounds so payable as aforesaid.
	(2.) When such company or person has no recognised agent or representative in Queensland other than the master of such vessel, or when such company, person, agent, or representative fails to make any return, the Commissioner may assess such master, and such master shall be liable to pay income tax computed as aforesaid.
	(3.) The Commissioner shall give notice of every such assessment as last aforesaid to the master, and such master shall thereupon pay income tax upon the same prior to the clearance of such vessel, and the vessel may be detained by the order of the Commissioner until such payment is made.
	EXEMPTIONS.
	12. The following incomes, revenues, and funds shall be exempt from income tax :—
	(i.) The income of the Governor of Queensland so far as respects the emoluments of his office as Governor ;
	(ii.) The revenues of local authorities and local bodies receiving revenue of any kind for the purposes of local self-government ;
	(iii.) The incomes of mutual life assurance companies ;
	(iv.) The incomes of societies and institutions not carrying on business for purposes of profit or gain ;
	(v.) The funds and incomes of societies registered under any Act relating to Friendly Societies (other than Building Societies), or under any Act relating to Trade Unions ;
	(vi.) The incomes and revenues of religious, charitable, and educational institutions of a public character ;
	(vii.) Income derived as dividends from any company which has paid in Queensland a duty on such dividends ;
	(viii.) Income arising or accruing from debentures, stock, or Treasury bills issued by the Government of Queensland.

2 Edw. VII., No. 10. (1 Dec., 1902.)

INCOME TAX—*continued.*

EXEMPTIONS—*continued.*

These exemptions shall not extend to the salaries, wages, allowances, or pensions of persons employed by any such corporation, company, society, or institution, although the same are paid wholly or in part out of the income, revenues, or funds thereof.

11. (ii.) Moreover, if by reason of age, infirmity, loss, or other cause the Commissioner is satisfied that the payment of income tax would entail hardship on any person liable to pay the tax, he may release such person in whole or in part from liability to pay the tax for that year.

PENALTIES.

72. (1.) Any person, whether or not liable to taxation under this Act, who—

(i.) Being within or having an agent within Queensland, fails to furnish, on or before the prescribed day, any prescribed return or within a time specified by the Commissioner, any new or further or fuller return required by the Commissioner, unless such person proves that such failure was not wilful; or

(ii.) Knowingly makes or delivers any false return or makes any false answer, whether oral or in writing, in relation to his property or income, or any matter or thing affecting his liability to or exemption from income tax; or

(iii.) By any falsehood, neglect, fraud, art, or contrivance whatsoever used or practised, or by or under any instrument made, signed, executed, taken, or received, evades or avoids or attempts to evade or avoid assessment of any income, whether liable to income tax or not, or the payment of any income tax—

shall be liable to a penalty not exceeding one hundeed pounds, and if the act or omission complained of affects any person as a taxpayer shall also by the Court before whom the matter is brought, by way of additional penalty, be assessed and charged double the amount of the income tax of which such person has attempted to evade or avoid the payment in addition to any income tax for which such person would have been otherwise liable.

(2.) Whenever upon any complaint for an offence within the meaning of paragraph (iii.) hereof the Court before whom the same is brought holds the matter of the complaint to be proved, there shall be two convictions: the first in the usual form adjudging the defendant to pay the penalty imposed and such costs as are allowed, and the second adjudging the defendant to pay double the amount of the income tax of which he has sought to evade or avoid the payment.

The first conviction shall be forthwith enforceable; but the second conviction shall not be formally drawn up until the amount of the income tax of which the defendant has attempted to evade or avoid payment has been ascertained by the Commissioner, who shall, as soon as practicable, proceed to ascertain and fix the same.

The Commissioner shall give notice to the defendant of the amount so ascertained, and if the defendant within fourteen days from the giving of such notice gives the Commissioner notice of objection to such amount he shall be entitled to have such objection heard and determined by the Court of Review.

At any time after such amount has been ascertained by the Commissioner, or upon objection by such Court, the second conviction may be formally drawn up adjudging the defendant to pay double the amount so ascertained or determined, and shall be forthwith enforceable.

(3.) Any person who aids or assists in any manner whatsoever to commit any offence within the meaning of paragraph (iii.) hereof shall be liable to a penalty not exceeding fifty pounds.

76. (1.) Any person who obstructs or attempts to obstruct any officer acting in the discharge of his duty under this Act, or refuses or neglects to answer any question put by any such officer relating to any income belonging to such pe son, or as to any deductions claimed or allowed in respect of such income or any part thereof, or gives any false or evasive answer, or in any manner whatsoever fails to comply with any of the provisions of this Act for which no penalty is expressly provided, shall be liable to a penalty not exceeding fifty pounds.

INCOME TAX—*continued.*

PENALTIES—*continued.*

(2.) If any company makes default in complying with any provisions of this Act, such company or the public officer thereof shall, where no other penalty is provided by this Act, be liable to a penalty not exceeding five pounds for every day during which such default continues:

And every director and manager of the company who knowingly and wilfully authorises or permits such default shall be liable to the like penalty.

78. The Commissioner may stay or compound proceedings for any penalty, and may reward any person who informs of any offence against this Act or assists in the recovery of any penalty.

54 Vic., No. 10. (6 Nov., 1890.)

DIVIDEND DUTY.

For and in respect of all dividends declared or ascertained by, or becoming due from any company—except Companies carrying on insurance business only—having its head office or chief place of business in Queensland, for every twenty shillings of the amount of such dividends, and a proportional sum for any part of such twenty shillings, the sum of ... ... £ 0 s. 1 d. 0

Provided that when such Company also carries on business beyond Queensland the duty shall be payable only in respect of so much of the dividend as is proportionate to the average capital of the Company employed in Queensland since the last preceding dividend was declared.

In the case of Companies—except Insurance Companies—which have not their head office or place of business in Queensland, or which transact their business through trustees or agents in the State, a like duty shall be payable on so much of the total dividends declared by the Company during the year as is proportionate to the average amount of the capital employed in Queensland during the year compared with the total average capital of the company during the year.

In the case of Companies carrying on Insurance business, the duty payable shall be computed on the gross amount of premiums received, but subject to deduction of any amount of such premiums actually paid away by way of re-insurance effected in Queensland with any other company. For every £100 or part of £100 of such premiums 1 0 0

Exemption.

So much of the dividends of companies which carry on in Queensland the business of mining as is shown to the satisfaction of the Treasurer to have been applied in the first place in repayment of the cost actually incurred by the company before the declaration of the first dividend in respect of labour or material employed in developing the mine, and, in the second place, in repayment of three-fourths of the cost of any machinery erected for raising ore or other materials from the mine, shall be exempt from dividend duty under this Act.

Duties under this Act are payable direct to the Treasurer.

56 Vic., No. 15. (4 Oct., 1892.) 2 Edw. VII., No. 4. (30 Aug., 1902.)

TOTALISATOR TAX.

There shall be paid to His Majesty in respect of all moneys received by the conductor of any authorised totalisator by way of stakes, wagers, or bets, or agreed to be paid to him in respect of any such stakes, wagers, or bets, for every twenty shillings so received or agreed to be paid... ... ... £ 0 s. 1 d. 0

58 Vic., No. 8. (23 Oct., 1894.)

If any person whose office it is to register or enter in or upon any books or records any instrument chargeable with duty, enrols, registers, or enters any such instrument, not being duly stamped, he shall incur a penalty not exceeding £50.

No company registered under "*The Companies Acts*, 1863 *to* 1893," or otherwise incorporated, shall register in the books of the company any transfer of shares or stock unless the instrument of transfer is stamped as prescribed by this Act.

Any company registering an unstamped or insufficiently stamped transfer of shares shall be liable to a penalty not exceeding £50.

And every director, manager, or other officer of the company who is concerned in registering such transfer shall be liable to the like penalty.

(1) Every person who issues, endorses, transfers, negotiates, presents for payment, or pays any bill of exchange or promissory note liable to duty, and not being duly stamped, shall incur a penalty not exceeding fifty pounds, and the person who takes or receives from any other person any such bill or note, either in payment or as a security, or by purchase or otherwise, shall not be entitled to recover thereon, or to make the same available for any purpose whatever, until it is duly stamped.

(2) Provided that if any bill of exchange payable on demand or at sight, or on presentation, is presented for payment unstamped, the person to whom it is presented may affix thereto an adhesive stamp of one penny, and cancel the same, as if he had been the drawer of the bill, and may thereupon pay the sum in the bill mentioned, and charge the duty in account against the person by whom the bill was drawn, or deduct the duty from the said sum, and the bill is, so far as respects the duty, to be deemed valid and available.

(3) But the foregoing proviso is not to relieve any person from any penalty incurred by him in relation to such bill.

Every person who—

(1) Receives or takes credit for any premium or consideration for any insurance, or does not, within three months after receiving or taking credit for the premium or consideration, make out and execute a duly stamped policy of insurance, unless the premium or consideration so paid shall in the meantime have been returned to the person paying the same; or

(2) Makes, executes, or delivers out, or pays or allows in account, or agrees to pay or allow in account, any money upon or in respect of any policy which is not duly stamped;

shall be liable to a penalty not exceeding £100.

(1) The duties imposed by this Act upon policies of insurance may be denoted by adhesive stamps, or partly by adhesive and partly by impressed stamps.

(2) When the whole or any part of the duty upon a policy of insurance is denoted by an adhesive stamp, such adhesive stamp is to be cancelled by the person by whom the policy is first executed.

(3) In default of such cancellation, the person issuing such policy shall be liable to a penalty not exceeding £20.

If any person—

(1) Gives a receipt liable to duty and not duly stamped; or

(2) In any case where a receipt would be liable to duty, refuses to give a receipt duly stamped; or

(3) Upon a payment to the amount of one pound or upwards, gives a receipt for a sum not amounting to one pound, or separates or divides the amount paid with intent to evade the duty;

he shall incur a penalty not exceeding £50.

Every person who does or causes or procures to be done, or knowingly aids, abets, or assists in doing, any of the acts following, that is to say,—

(1) Forges a die or stamp;

(2) Prints or makes an impression upon any material with a forged die, or by any means or device whatsoever;

(3) Fraudulently prints or makes an impression upon any material from a genuine die;

(4) Fraudulently cuts, tears, or in any way removes from any material any stamp with intent that any use should be made of such stamp or of any part thereof;

(5) Fraudulently mutilates any stamp, with intent that any use should be made of any part of such stamp;

(6) Fraudulently fixes or places upon any material or upon any stamp, any stamp or part of a stamp which, whether fraudulently or not, has been cut, torn, or in any way removed from any other material or out of or from any other stamp;

(7) Fraudulently erases or otherwise either really or apparently removes from any stamped material any name, sum, date, or other matter or thing whatsoever thereon written, with intent that any use should be made of the stamp upon such material;

(8) Knowingly sells or exposes for sale, or utters or uses, any forged stamp, or any stamp which has been fraudulently printed, or impresses from a genuine die;

(9) Knowingly, and without lawful excuse (the proof whereof shall lie on the person accused), has in his possession any forged die or stamp, or any stamp which has been fraudulently printed, or impresses from a genuine die, or any stamp or part of a stamp which has been fraudulently cut, torn, or otherwise removed from any material, or any stamp which has been fraudulently mutilated, or any stamped material out of which any name, sum, date, or other matter or thing has been fraudulently erased or otherwise either really or apparently removed;

shall be guilty of felony, and shall, on conviction, be liable to be kept in penal servitude for any term not exceeding fourteen years, or to be imprisoned, with or without hard labour, for any term not exceeding two years.

COAL MINING.

	Annual rent for license, per acre. £ s. d.
Any person who is desirous of prospecting Crown lands for coal may make application in the prescribed form to the proper Warden for a license to occupy any Crown lands described in the application, and not being of greater area than six hundred and forty acres, for the purpose of searching for coal thereon	0 0 6

The license may be renewed by the Minister for another year upon payment of a like sum of sixpence per acre of the land comprised therein, and upon proof to the satisfaction of the Minister that the licensee has during the period of the license used reasonable endeavours to search for coal upon the land, and has not used the land for any purpose not hereby authorised.

If during the period of the license or the renewed license the licensee desires so to do he may apply for a lease of any part of the land comprised in the license not exceeding three hundred and twenty acres in extent, and his application shall have precedence over the application of any other person for the same land.

The yearly rent of land leased for the purpose of mining for coal shall, instead of being at the rate of ten shillings per acre, be at the rate of sixpence per acre, and there shall also be reserved in the lease a royalty at the rate of threepence for every ton of coal raised from the land during the first ten years of the term of the lease, and at the rate of sixpence for every ton raised during the remainder of the term.

The times and mode of ascertaining the amount of any royalty so payable and the time for payment thereof shall be prescribed by the lease.

If land leased for the purpose of mining for coal is used for the purpose of mining for any other mineral, rent shall become payable in respect thereof at the rate of ten shillings per acre in addition to the royalty, if any, payable in respect of coal raised therefrom.

SPECIAL PRIVILEGE TO DISCOVERER OF NEW COAL FIELD, OR COAL AT GREAT DEPTHS.

When a licensee under the provisions of this Act—

(1) Discovers payable coal at a distance of not less than fifteen miles from any payable coal previously discovered, or,

(2) Discovers a payable seam of coal at a depth of not less than six hundred feet from the surface, he shall be entitled to a lease of six hundred and forty acres of land, instead of three hundred and twenty acres as hereinbefore provided, and the royalty payable in respect of coal raised by the lessee shall in the first-mentioned case as to all coal, and in the second-mentioned case as to all coal raised from a depth of six hundred feet and upwards, be at the rate of one penny for every ton, instead of threepence as hereinbefore provided.

NOTE.—The amount actually realised bears but a small proportion to the amount sought to be recovered; but it must be borne in mind that in many cases the defendant, on a levy being made, becomes insolvent, and any property seized passes to the Official Trustee for the benefit of the Creditors, and consequently no sale by the Sheriff takes place. Many also of these writs of *fieri facias* were for large amounts, the suitors holding mortgages over and being in possession of the property seized, and were merely lodged for the purpose of obtaining the Sheriff's title for the conveyance of the interest, the purchase money being nominal.

C.A. 19—1904.

FORTY-FOURTH ANNUAL REPORT ON THE VITAL STATISTICS OF QUEENSLAND FOR THE YEAR ENDED 31st DECEMBER, 1903.

TO THE UNDER SECRETARY, HOME DEPARTMENT.

SIR,—The conditions obtaining in Queensland, for some years past, with respect to that section of Social Science, which is based on the records of the births, marriages, and deaths of the population, have been hardly satisfactory as illustrative of material and moral progress. Both the birth and marriage rates have been low, and have exhibited signs of still further decline, and although the ratio of deaths have borne evidence to the salubrity of the climate of the State, yet the loss of child life from causes that may be classed as preventable is too great, and unless some improvement results in this direction, the ratio of mortality will certainly advance with the changing age condition of the people.

In 1903 there were fewer births and marriages registered and more deaths recorded than in 1902. The numbers of the first named were below those for any year since 1886, and, after making every allowance for reduced marriage rates, owing to financial depression, and for the changed age condition, resulting from the stoppage of immigration, must, I think, be accepted as evidencing in some degree at least a deliberate determination to avoid the responsibilities of parentage. For the second time in the annals of Queensland the migration experience has exhibited a minus quantity towards the framing of population estimates, in both 1902 and 1903 the natural increase was trenched upon to make good decreases due to excess of emigration. It is satisfactory to note, however, that the deficiency in 1903 was about half that of the previous year.

POPULATION.

The population estimates have been framed in accordance with the agreement arrived at at the Statistical Conference held in Melbourne in September of last year, certain percentage allowances being made to the arrivals and departures to allow for those assumed to have escaped record.

The population so estimated for the 31st December, 1903, consisted of 285,297 males, and 230,233 females, and 515,530 persons, an increase of 2,102 males, 2,575 females, and 4,677 persons. The figures for 1903 are exclusive of aborigines. In the estimates for 1900, 1901, and 1902 civilised aborigines were included to the number of 5,137; these have now been omitted, in compliance with the decision of the Conference, and the figures for those three years revised.

Full particulars as to the method of compilation are shown in the following table:—

* Including allowance for unrecorded arrivals.

† Including allowance for unrecorded departures.

The natural increase amounted to 6,275 persons, of whom 2,476 were males, and 3,799 were females. The decreases due to excess of departures, after making the allowances above referred to, were 374 males, and 1,224 females, and 1,598 persons. The large decrease of females, due to emigration, materially discounting the female excess in the natural increase.

The natural increase for March quarter was a small one, due to a heavy death roll for the three months, but showed little variation for the other three quarters. The experience of the first quarter, as regards migration, was also unfavourable, the decrease from this cause more than absorbing the natural increase for that period, so that the population was less on the 31st March than on the 1st of January. This was partially compensated for in the following quarter, when the population increase was nearly half of that for the whole year.

The centesimal increases of population for the Australian States and New Zealand for 1903 were as follow:—

Aa.

Queensland	0·92	Western Australia	5·48
New South Wales	1·70	Tasmania	1·36
Victoria	0·28	New Zealand	3·04
South Australia	0·83		

The population by sex, and the centesimal proportion of each sex to the total in each State, is shown in the following table:—

Ab.

State.	Estimated Population, 31st December, 1903.			Proportion of each sex in each 100 of the Population.	
	Males.	Females.	Persons.	Males.	Females.
Queensland	285,297	230,233	515,530	55·34	44·66
New South Wales	754,653	677,011	1,431,664	52·71	47·29
Victoria	605,361	603,493	1,208,854	50·08	49·92
South Australia	187,153	181,670	368,823	50·74	49·26
Western Australia	135,961	90,993	226,954	59·91	40·09
Tasmania	93,078	86,409	179,487	51·86	48·14

Total Australasia	2,501,177	2,262,640	4,763,817	52·50	47·50

The unusual experience of a large number of females figuring amongst the excess of departures, to which reference has been made, has, of course, militated against expansion during 1903 of the female ratio in the population; the advance in this respect last year was fractional only, but with figures covering a period of 20 years has been more pronounced.

Whilst in 1880 there were 17 more males than females in each 100 of the population, that number had been reduced to 10 in 1903. State-aided immigration, for the most part, consists of young adults, and with the sex reasonably proportioned, with generally, however, a preponderance of males. This explains the recedence in the proportion of females disclosed during the quinquennium 1880-5. The following periods were ones in which the natural increase predominated, and consequently females were in the majority in the population increase, as is ever the case, unless, as in 1903, countervailed by an excess of female departures.

Details respecting population accretions for each year since 1861, shown both numerically and proportionally, are furnished in the following table:—

NOTE.—* Figures adjusted after actual population ascertained by census.
§ Including allowances for unrecorded arrivals and departures.
‡ Decrease due to census adjustment.
— Excess of departures.

A reference to column 15 discloses the fact that the ratio of population increase for 1903 was just below 1 per cent.—0.92. In the previous year the ratio of increase was 0.97 per cent., and in 1901 2.38 per cent. These figures speak for themselves. The question of immigration is, perhaps, beyond the scope of this Report; but the natural resources of a country may be ever so great, yet it is impossible that they can be satisfactorily developed with a population considerably short of one person to each square mile of area, whilst the natural increase, even under the most favourable conditions—and such can hardly be considered as obtaining at present in Queensland—would never suffice to create a population commensurate with the capabilities of the territory.

If a comparison is made between recent experiences and that of previous years, the serious character of the decline in population increase will, perhaps, be better realised. An opportunity for doing so is afforded by the following table:—

— Excess of departures. * Including allowances for unrecorded arrivals and departures.

The large addition to the population during the decade of 1881-90, due to the excess of immigration, as shown in the first three columns of the table, numbering as it did 147,000 persons, would by its numerical potency alone prove an important factor in development along every line of production and trade; but, in addition, by the character of its component elements, it contributed largely to the other section of population accessions as is shown, more particularly by figures given in the last column for the 10 years 1886-95.

Arrivals and Departures.

It has been found necessary, as already referred to, before utilising, in the framing of population estimates, the returns of arrivals and departures, as furnished by the Customs, to make certain additions to the latter for the unrecorded departures. A *pro ratâ* allowance is also made in the same estimate, with respect to both arrivals and departures by rail, to allow for traffic borderwise other than by rail. In all references to migration, therefore, so far as it is connected with the compilation of population, the figures quoted include such allowance. It will be manifest, however, that in all other relations, where detail of immigration and emigration are discussed, the actually recorded figures only can be dealt with.

The arrivals within the State last year, as actually recorded, numbered 34,329 persons, of whom 24,289 were males, and 10,040 were females. This was 247 persons more than in 1902; but, whilst 472 more males arrived in 1903 than in 1902, there were 225 fewer female arrivals in the former than in the latter year. The recorded departures numbered 23,600 males, 10,686 females, and 34,286 persons, leaving excesses of 689 male arrivals and 646 female departures.

It is not found practicable to secure any elaborate return as to the ages of passengers, but as regards the seaborne traffic, a crude division into adults, children, and infants is obtained, 1 year and 12 years of age being the limits of the two latter classes, all over 12 years of age being returned as adults. Of the arrivals 32,047 or 93.3 per cent. were adults, 2,180 or 6.4 per cent. were children, and 102 or 0.3 per cent. were infants. The corresponding figures for departures were 31,508 or 91.9 per cent. adults, 2,664 or 7.8 per cent. children, and 114 or 0.3 per cent. infants.

Of the total arrivals and departures 63,625 or 93 per cent. were from or to the other States of the Commonwealth, whilst the numbers and centesimal ratios for males and females were 43,433 and 91, and 20,192 and 97 each respectively.

Particulars respecting the passenger traffic with the other States, discriminating between seaward and overland, are furnished in the following table:—

Of the total number of passengers, with the rest of the Commonwealth, 48 per cent., or 30,244, went by sea, the centesimal ratio and number of males being 45.5 and 19,391, and of females 54.5 and 10,853 respectively. The summer months, when people are seeking relaxation in the supposedly cooler climates of the southern States, naturally contribute the largest share of the traffic, the numbers and ratios to the total being—1st quarter, 16,029, or 25 per cent.; 2nd quarter, 14,271, or 22 per cent.; 3rd quarter, 14,456, or 23 per cent.; and 4th quarter, 18,869, or 30 per cent.

Until 1900 the arrivals from the other States were always in excess of the departures, but in that year and in 1902 the departures exceeded the arrivals. The following table furnishes particulars on this point for each of the past 10 years:—

Bb.

— Excess of Departures.

These figures show that for the past few years the migration experience has tended to deplete the female population.

The overland route would appear to be growing in favour, as the proportion of traffic borderwise is steadily increasing. To some individuals the sea voyage is a direct attraction; but these, probably, constitute the exception, and rapidity of transit outweighs with many all other considerations. The proportions of traffic with the rest of the Commonwealth which travelled by rail for each of the past 10 years were as follow:—

Bc.

30·29	24·55	35·54	40·59	36·85	38·28	48·30	53·87	50·78	52·47

No doubt the increased opportunity for travelling by pass, which the establishment of a Federal Parliament has offered, is responsible for a share of the increase, and the opening of another line of railway communication with New South Wales, *viâ* the Tweed, will in the future tend to the same end.

Separate returns of coloured Asiatic and Pacific Island alien immigration and emigration are furnished monthly by the Customs authorities at each port. These are divided into five races or groups, as agreed at the Conference, and the results of this collection are furnished in the following table:—

C.

Total	1,878	63	1,941	2,223	99	2,322	...	381

There was an excess of departures of all coloured aliens of 381, consisting of Chinese 207, Pacific Islanders 95, Japanese 68, India and Ceylon 89; whilst there was an increase of "Other Asiatics"—chiefly Syrians— amounting to 78. The arrivals of coloured aliens numbered 1,878 males, 63 females, and 1,941 persons; and the departures 2,223 males, 99 females, and 2,322 persons.

Coloured Alien Population.

Estimates of coloured alien population are framed in the same manner as those of the total population, with the exception that the recorded figures only are employed, as it is considered that with such limited numbers there is less margin for error. The estimate for 1903 is as follows:—

Ca.

ESTIMATED NUMBER and PROPORTION of MALES, FEMALES, and PERSONS of COLOURED ALIEN RACE in the POPULATION of QUEENSLAND on the 31st December, 1903.

Total Estimated Population of the State ...	285,297	230,233	515,530	100·00

Out of a population of 515,530 it is estimated that 491,844 or 95.41 per cent. were practically of European extraction. The like proportions of each sex were:—Males 92.3 and females 99.3 respectively. The Chinese numbered 9,490 males, 557 females, and 10,047 persons, or 1.95 per cent. of the total population; similar figures for Pacific Islanders were 7,959 males, 604 females, and 8,563 persons, or 1.66 per cent. These two races comprised 79 per cent. of the coloured alien population.

The following table shows the decline, since 1891, in the proportion of Chinese and Pacific Islanders to the total population:—

Cb.

In 1891, Chinese and Pacific Islanders comprised 4.57, and last year 3.61 per cent. only of the total population.

Population in Financial Divisions.

An estimate of the population in each of three great divisions of the State is occasionally required in connection with the apportionment of financial and other matters. It would not be practicable during intercensal periods to frame by compilation in the usual manner any reliable division of the population into these different areas. Such particulars can only be definitely ascertained at a census enumeration, and, therefore, the arithmetical process of proportion has to be resorted to, it being assumed that the relations obtaining at the census still prevail. On this basis the populations in each division were as follow:—

Males	71,438	37,032	176,827	285,297
Females	42,110	28,434	159,689	230,233
Total Persons	113,548	65,466	336,516	515,530

By this means the 285,297 males, estimated as being in the State on the 31st December last, are apportioned to each of the great divisions as follow:—North, 71,438; Central, 37,032; South, 176,827. In a similar manner it is presumed that there were on the same date 42,110 females in the Northern, 28,434 in the Central, and 159,689 in the Southern division each respectively, giving total population for each division of North 113,548, Central 65,466, and Southern 336,516. It will be noted that there is a considerable difference in the ratios of the sex, the North possessing 60 females to each 100 males, the Central 77, and the South 90.

Population in Metropolitan Area.

The area embraced by a radius of 10 miles from the General Post Office has for a long time past been accepted as the limits of Greater Brisbane. The estimate of population within this area is computed upon certain basic data, kindly furnished by the town clerks of the various component Local Authorities, and on the 31st December, 1903, is estimated to have numbered 124,463 persons, of whom 61,629 were males and 62,834 were females, thus showing an excess of the latter sex. This gives an increase of population for the year of 1,648 persons. Fuller information is furnished in the following table:—

Da.

	Males.	Females.	Persons.
City of Brisbane	18,253	18,895	37,148
City of South Brisbane	13,606	14,519	28,125
Shipping on River (Census, 1901)	753	92	845
Brisbane Registry District	32,612	33,506	66,118
Outside Registry District, but Within Ten-mile Radius ...	29,017	29,328	58,345
Brisbane Metropolitan Area (Ten-mile Radius)	61,629	62,834	124,463

Thus 53 per cent. of the population is found within the two cities of Brisbane and South Brisbane.

Mean Population.

Considerable diversity of practice has in the past existed in the different States as to the method of computing the mean population. At the last Conference, to secure uniformity, it was agreed that in future the average of the mean population of each quarter should be accepted as the mean population of the year. On this basis the estimated mean population of Queensland for 1903 was:—

Males.	Females.	Persons.
283,821	228,869	512,690

MARRIAGES.

There were fewer marriages celebrated in 1903 than in any year since 1897, the number having declined each successive year since 1899, when 3,449 were recorded; last year the number was 2,933, a decrease of 516 on the figures for 1899, and of 310 on those for 1902.

The following table gives full information as to the number of marriages registered during 1903:—

TOTALS	644	722	788	779	2,933

The latter half of the year shows a marked improvement in the number of marriages celebrated, the last two quarters recording 788 and 779, against 644 and 722 respectively for those ending March and June, an increase of 201 in the two former. In 1902 it was the first half of the year that witnessed the largest share of the marriages, so that the special decline in the number was experienced during the financial year 1902-3. There were 7 districts in which upwards of 100 marriages were registered during the year. In Brisbane 675 or 23 per cent. of all marriages were recorded; then Kennedy (Charters Towers) with 208; Drayton and Toowoomba, 149; Townsville, 124; Rockhampton, 118; and Gympie and Ipswich, 104 each.

Marriage Rate.

The marriage rate—*i.e.*, the number of marriages celebrated to each 1,000 of the mean population—is a fairly reliable index to the material prosperity of the community, and the financial depression existing last year was reflected in the low ratio of 5.7 In 1894 exactly the same rate obtained, otherwise in no year's experience has it been so low.

The following table furnishes the marriage rate for each year since the initiation of official registration:—

Ea.

1872	8·7	1888	8·7		

The rates experienced in the early sixties, when, under State-aided immigration, a large number of young unmarried men and women were streaming into Queensland could not now be looked for, and probably a ratio of from 7 to 8 per 1,000 is all that would obtain under the most favourable material conditions.

The following table compares for the last 5 years the marriage rates in each of the States of Australasia:—

Marriages by Denominations.

Full particulars as to the number of marriages celebrated by ministers of each religious denomination in each district of the State is furnished in Table No. VII. in the Appendix. From this it would appear that of all marriages solemnised in accordance with religious rites of some kind 97 per cent. were celebrated by clergymen of one or other of the 7 leading denominations.

A comparison for 2 years as to the number of marriages celebrated by ministers of each denomination is afforded by the following table:—

F.

Denomination.	Marriages in 1902.	Marriages in 1903.	Numerical Increase or – Decrease in 1903.	Centesimal Increase or – Decrease in 1903.
Church of England	883	741	–142	–16·08
Roman Catholic Church	645	589	–56	–8·68
Methodist	523	476	–47	–8·99

Congregational	122	104	–18	–14·75
Salvation Army	16	9	–7	–43·75
Other Christian Sects	93	84	–9	–9·68
Hebrew	...	1	1	100·00
By Registrars and Marrying Justices	230	200	–30	–13·04
TOTALS	3,243	2,933	–310	–9·56

From this it will be seen that 142 or 46 per cent. of the total decrease of marriages in 1903 was in the number celebrated by ministers of the Church of England; 56 or 18 per cent. by the Roman Catholic Church, and 47 or 15 per cent. by the Methodist Church. The only denominations celebrating a greater number of marriages in 1903 than in 1902 were the Congregational and the Hebrew Churches, the firstnamed celebrating 158 in the former year against 156 in the latter, and the lastnamed 1 in 1903 and none in the previous year.

The centesimal ratios of decrease in number by the more important (numerically) bodies were:—Church of England, 16.08; Roman Catholic Church, 8.68; Methodist, 8.99; and Presbyterian, 0.90. The latter church showing a numerical decline of 4 only.

The following table shows the number of marriages celebrated by each denomination for each of the past 10 years:—

Fa.

TOTALS	2,502	2,821	2,823	2,894	2,972	3,449	3,371	3,341	3,243	2,933	30,349

Taking the 7 most important (numerically) it will be seen that whilst the fourth, fifth, and seventh showed, in 1903, a slight excess in the number of marriages over the mean for the decade the first three showed considerable decline.

There were 200 civil marriages contracted during the year, 42 of them in the Brisbane district. This gives a ratio to total marriages of not quite 7 per cent.

Evidence is not wanting as to the futility of forming any conclusions, as to the numbers or proportions of members of any religious body, based on the marriages celebrated by its ministers. It is reasonable to assume that the proportions of each denomination to the total population were for 1903 the same as the census for 1901. The following table shows, for the leading denominations, their ratio to the population, as returned on the census schedules in 1901, and their ratio to the total marriages as represented by the marriage certificates of ministers celebrating marriages during 1903:—

Fb.

	Proportion per cent. each Denomination to total—	
	Population. Census, 1901.	Marriages, 1903.
Church of England	36·76 ...	25·26
Roman Catholic Church	23·98 ...	20·08
Methodist Church	9·25 ...	16·23
Presbyterian Church	11·45 ...	15·04
Lutheran Church	5·07 ...	4·43
Baptist Church	2·43 ...	5·39
Congregational Church	1·94 ...	3·55

These figures would appear to show that the claims of their particular creed or sect sit lightly on most individuals, for, whilst 37 in each 100 of the population were returned at the census as Church of England, the like proportion of marriages celebrated by ministers of that denomination was 25 only. Similar ratios for other bodies were:—Roman Catholic, 24 and 20; Methodist, 9 and 16; and Presbyterian, 11 and 15. The marriage ratios in the last two instances being considerably in excess of the population proportions.

Birthplaces of Persons Married.

Full particulars on this head can be obtained from Table VIII. in the Appendix. Persons born in Queensland are now the largest contributors to the ranks of the votaries of Hymen. The following statement shows the centesimal proportion of Queensland born to all persons married quinquennially since 1875:—

G.

1875.	1880.	1885.	1890.	1900.	1903.
7·20	13·77	19·63	25·98	49·38	56·24

The number of natives of New South Wales married during 1903 was 426, of whom 253 were husbands, and 173 were wives. Natives of England numbered 935, of Scotland 249, of Ireland 315, and of Germany 117. Coloured aliens married numbered 86—namely, 61 men and 25 women—besides which 17 aboriginal women were married to men not of their own race, of whom 13 were married to coloured aliens.

Ages and Conjugal Condition of Husbands and Wives.

On tabulating the ages of persons married, some apparently incongruous matches are disclosed. Thus one child of 14 married a man of 34, a girl of 16 a man of 42, and one of 18 an old man of 64. On the reverse side it appears that a young man of 29 selected a consort of 51. Full information on this point may be gathered from the Appendix, Table No. IX., a summary of which appears in the following statement:—

Totals	2,933	115	37	58	80	165	216	213	232	251	237	1,329

Of the 2,933 husbands, 455 or nearly 16 per cent. married wives older than themselves, and 216 wives of the same age. Of all husbands, 87 were under 21 years of age; 1,919 were between that age and 30 years; 862 between 30 and 50; and 65 upwards of the latter age. Of wives, 724 were under 21; 1,827 between 21 and 30; 366 between 30 and 50; and only 16 above 50 years of age.

The conjugal conditions of all persons married during 1903, and the numbers of each intermarrying, together with the mean age at marriage, is shown in the following statement:—

Ha.

Divorced Women	6	0·20	...	28·33
Total Persons Married	5,866	200·00	29·26	24·48

Thus 2,534 or 86 per cent. of the total were first marriages, *i.e.*, the marriages of bachelors and spinsters; of all husbands, 92.12 per cent. were bachelors; and of all wives, 91.75 were spinsters.

The mean age at marriage last year was, for all husbands 29.26, and for all wives 24.48, but exclusive of widowed and divorced—that is, the mean age of all bachelors and spinsters—was 28.15 for the former, and 23.37 for the latter.

Investigation on this point shows remarkably little variation over a course of years, the ratios for the past 10 years being as follow:—

Hb.

	All Husbands.	Bachelors.	All Wives.	Spinsters.
1894	28·57	...	23·91	
1895	28·70	...	23·81

1901	29·31	28·28	24·57	23·47
1902	29·05	27·98	24·57	23·48
1903	29·26	28·15	24·48	23·37

As might be expected with a decline in the marriage rate, what variation is shown is in the direction of a rise in the mean ages during recent years.

Persons divorced in Queensland can be remarried elsewhere, and, as the converse is equally true, the relation between dissolutions of marriage and the marriages of divorced persons is disturbed by these factors; but, assuming that they balance one another, the following table is of interest:—

Hc.

	1894.	1895.	1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.
Dissolutions	6	4	3	6	7	10	12	14	6	8
Marriage of Divorcees	3	7	8	3	7	13	15	21	14	12

For the ten years ended 1903 there were 76 dissolutions of marriage granted by the courts of the State, or 152 persons were divorced, whilst during the same period 103 divorced persons were remarried.

Fertility of Marriage.

With a declining birth rate it is natural to suppose that the fertility of marriage would also decrease—that is, that there would be fewer children to each marriage. Tested by the ratio of legitimate births in each year to the marriages of the preceding year, the experience of recent registrations would confirm this expectation. The number of children to each family on this hypothesis was as follows:—

I.

1894	5·29	1899	4·40
1895	5·65	1900	4·02
1896	4·71	1901	3·99
1897	4·76	1902	4·00
1898	4·52	1903	3·63

For the first five years of the decade the mean was 4.99 children to each family, and for the last five years 4·01, or a decline of 0·98, practically a decrease from 5 to 4 children.

Degree of Illiteracy.

With the general advance in education, "illiterate" now conveys more than formerly, when the power to read and write, no matter how imperfectly, was considered to raise persons from out of the ranks of the "illiterate." As the majority of adults marry, the proportion of persons who sign the marriage register by mark is accepted as indicating the number in the population unable to write.

Ia.

Year.	Number of Persons in each Year who signed Marriage Certificate with a Mark.		Proportion to each 100.		
			Marriages.		Persons Married.
	Males.	Females.	Males.	Females.	Persons.
1875	135	267	9·08	17·96	13·52
1880	90	187	5·82	12·09	8·95
1885	107	209	3·76	7·35	5·56

1895	82	76	2·90	2·69	2·80
1900	58	88	1·72	2·61	2·17
1903	50	59	1·71	2·01	1·86

Thus of all persons married 98 in every 100 signed their names, the males showing rather better than the females, as there were 1.71 per cent. of marks-men and 2.01 of marks-women. If coloured aliens, however, are excluded from the computation, the position is still further improved. Of the 109 persons who signed the marriage register by mark, 48 were coloured aliens, 30 males and 18 females.

BIRTHS.

There were fewer births registered in 1903 than in any year since 1886. Of the 12,621 total births, 6,427 were males and 6,194 were females. In 1902 there were 14,216 recorded, showing a numerical decrease in 1903 of 1,595, and a centesimal one of 11.22. These are by far the largest, both actual and proportional, decreases ever experienced in Queensland. The following statement furnishes information on this head for the past 10 years:—

Table No. VI. in the Appendix gives the number of births registered in each district of the State. A summary of this table for the last two years, respecting a few of the more important (numerically) districts, is contained in the following statement:—

In every one of these districts, except Cairns, it will be noticed there was a decrease in the number of births in 1903, as compared with 1902. The largest decrease was in Moreton West, where it amounted to 154, followed by Brisbane with 147. Over a considerable number of births the proportion of males almost invariably preponderates. In 1903 throughout Queensland there were 96.37 females born to every 100 males, or 1.07 females more than in 1902, when the ratio was 95.30. In some of the individual districts in the above table, however, the female births exceeded the male, namely:—Maryborough, Enoggera, Cairns, Ipswich, and Drayton and Toowoomba. In the firstnamed district there were 112 females to each 100 male births.

The following statement gives for the total births of each year since 1894 the centesimal ratio of female to male births:—

Jb.

Year.	Females born to every 100 males born.	Year.	Females born to every 100 males born.
1894	93·94	1899	94·99
1895	95·61	1900	94·78
1896	97·81	1901	96·44
1897	96·69	1902	95·30
1898	96·71	1903	96·37

The mean for the 10 years was 95.86, so that last year the females were 0.51 in excess of the average for that period. In 1903, out of each 100 births, 50.92 were males, and 49.08 were females.

Birth Rate.

The birth rate last year, 24.6, was, as previously stated, the lowest ever recorded in Queensland. The following table shows the rate at successive quinquennial periods since 1860:—

K.

1860	47·9	1880	36·9	1900	30·2
1865	43·6	1885	36·7	1901	28·3
1870	43·5	1890	37·2	1902	27·7
1875	37·5	1895	32·8	1903	24·6

The decline since 1890 has been very pronounced, but has not been peculiar to this State; but a similar, if not indeed an equal, experience has been noted throughout the Commonwealth. Undoubtedly the changed age condition of the people has been to a considerable extent the cause of the decline. The rates obtaining during the earlier years of those recorded were abnormal, and were only possible with relatively a very large adult population, such as resulted from the inflow of continuous streams of immigration. With the surcease of these, population accessions were dependent upon natural increase, with an immediate and rapid advance in the ratio of children, whilst less rapidly, but as surely, time increased the proportion of the old. This, however, is insufficient to explain the decrease, and it is probable that the elaborate investigations made elsewhere would, if followed out here, show some of the same results. The simple and inexpensive test of comparing the number of births against the number of married women of child-bearing age shows that within the last 40 years the fertility of the marriages in the State has declined.

1901 ...	53,617	50,561	13,455	848	250·95	16·77	137·29

Census years have been selected for the comparison to secure accuracy as to age. Thus, whilst in 1861 the births numbered 246 to each 1,000 women of 15 to 45, in 1901 the number had shrunk to 137. Taking the legitimate births to married females of the same ages, it is seen that in 1871—this information is not available for 1861--there were 327 to each 1,000, and 251 in 1901. The changing age condition which resulted in a relatively reduced number of women of 15 to 45 occasioned a greater mean age of the women between these two periods of life, and this in turn further reduced the birth rate, as women of the older child-bearing ages are less prolific.

The coloured aliens adversely affect the birth rate, as they do not contribute to the births at all in proportion to their population numbers. The children of coloured alien race born last year numbered 112—namely, 69 males and 43 females—as follows:—

Kb.

	Males.	Females.	Persons.
Chinese	30	17	47
Pacific Islanders	16	13	29
Japanese	5	4	9
Natives of India and Ceylon ...	3	3	6
Other Asiatics	15	6	21
Totals	69	43	112

This figure is not quite 1 per cent. of all births, whilst these races numbered 23,686 at the end of last year, or 4.59, of the population. By excluding the coloured aliens from the calculation, the birth rate amongst persons of European extraction is arrived at, as will be seen from the following statement:—

Kc.

Year.	Birth Rate Proper.	Birth Rate on the basis of excluding Coloured Aliens from the calculation.
1894 ...	31·86	33·11

1901 ...	28·28	29·93
1902 ...	27·68	29·28
1903 ...	24·62	25·59

Thus the rate is affected to the extent of about 1 per 1,000.

Illegitimate Births.

The decline in the number of illegitimate births has by no means kept pace with the decline in the number of total births. There were 859 illegitimate births recorded in 1902, and 857 in 1903, the latter consisting of 418 males and 439 females. The following table shows the number registered in each quarter of the year:—

L.

	Males.	Females.	Persons.
First quarter	114	101	215
Second "	98	106	204
Third "	104	119	223
Fourth "	102	113	215
Total	418	439	857

The proportion borne by these figures to the total births of the year was greater than ever previously recorded—namely, 6.79 to each 100. The degree of illegitimacy thus measured for each of the past 10 years was as follows:—

La.

1894	4·52	1898	6·04	1901	5·93
1895	4·93	1899	5·97	1902	6·04
1896	5·22	1900	6·40	1903	6·79
1897	6·02				

Although showing considerable fluctuations from year to year, yet a distinct increase in the ratio throughout the decade is apparent.

The ratio of illegitimacy in Queensland is greater than in most of the Australasian States, as may be seen from the following:—

Lb.

	Per Cent. to Total Births.		Per Cent. to Total Births.
Queensland	6·79	Western Australia	4·69
New South Wales	6·71	Tasmania	*6·12
Victoria	*5·51	New Zealand	4·55
South Australia	4·16		

* 1902 figures.

It is generally accepted as a fact that the conditions obtaining in populous centres conduce to illegitimacy. With respect to Queensland, the rule applies in the case of Brisbane, Rockhampton, and Townsville; but the other towns show a degree of bastardy below that for the whole State.

Townsville	6·17	5·42	5·85	5·96	484	46	9·50

The large ratios exhibited in the three cities mentioned is due in part to the presence of more than one institution designed to assist women in their confinement, and which are chiefly availed of by mothers of illegitimate children, who are thus drawn from other districts to which they properly belong; moreover, outside such institutions, expectant mothers of illegitimate children resort to towns as affording facilities for hiding their shame, not to be had in the localities where they are known.

Twins and Triplets.

There were 101 twin confinements, 2 cases of triplets, and 1 of quartettes recorded during 1903. The number of twins born in each quarter of the year was as follows:—

Ld.

	Males.	Females.
First Quarter	23	27
Second Quarter	32	18
Third Quarter	25	31
Fourth Quarter	25	21
	105	97

As twins numbered 262 in 1902 and 202 last year, the decrease was 60. The triplets were born in the 3rd and 4th quarters of the year; one set at Maryborough, and one in Brisbane. The quartettes were born at Toowoomba in the March quarter.

DEATHS.

The climate of Queensland is naturally so healthy that the mortality statistics compare favourably with those of almost all countries publishing statistics. Although for a short period of the summer, especially in certain localities, the temperature is somewhat high, and the people frequently called upon by their vocations to submit to exposure and privations, yet comparatively little illness or death results. Children are large contributors to the death roll, and chiefly from preventable causes. In 1903 there were more deaths recorded than in any other year of the decade.

The number of deaths, and the death rate for each of the last 10 years, is given in the following table:—

M.

1903	283,821	228,869	512,690	3,951	2,395	6,346	13·92	10·46	12·38

Of 6,346 deaths registered in 1903, 3,951 were males and 2,395 were females; the deaths in 1902 numbered 6,204, consisting of 3,924 males and 2,280 females, so that the increase in the deaths in 1903 was 27 males, 115 females, and 142 persons.

Death Rate.

The Queensland death rate, as recorded, is about 12 per 1,000, that for males being nearly 2 per 1,000 over, and females some 2 per 1,000 below, that ratio. The death ratios for 1903, which were slightly above the average, were—Males, 13.92; females, 10.46; and persons, 12.38.

The age condition of the population is, of course, an important factor in death rates, as it is manifest that where young children and aged persons are relatively more numerous, other things being equal, a larger proportion of deaths may be anticipated. The quoted death rate for Queensland is favourably affected by this cause, and this point is dealt with further on in this report. On the other hand, the coloured aliens adversely influence the mortality statistics, as they add to the deaths in greater proportion than their numbers would warrant, and this notwithstanding that they are for the most part adults in the prime of life. The mean population, the deaths, and the death rates of coloured aliens for 1903 were as follow:—

Ma.

	Estimated Mean Population.	Number of Deaths.	Death Rate.
Chinese	10,166	125	12·30
Pacific Islanders	8,621	306	35·49
Japanese	2,132	24	11·26
Coloured Natives of India and Ceylon ...	1,099	20	18·20
Other Asiatic Races	1,804	14	7·76
Total Coloured Aliens ...	23,822	489	20·53
All Persons, exclusive of Chinese, Pacific Islanders, other Asiatic Races	488,868	5,857	11·98
All Persons	512,690	6,346	12·38

The 23,822 coloured aliens contributed 489 deaths, or a rate per 1,000 of 20.53, whilst with persons of European extraction the death rate was only 11.98. Japanese had a rate even lower than the latter, but persons of this race in the State are nearly all of them adults in the prime of life. The abnormal death rate of 35.49 contributed by the 8,621 Pacific Islanders is the chief factor in raising the general death rate to 12.38 from the 11.98 contributed by persons of European extraction.

In the following statement a comparison of the death rate of various Australasian States is afforded:—

Deaths by Districts and Months.

Full particulars on this point will be found at Appendix Table No. XI. There were 1,123 or 18 per cent. of all deaths registered in the Brisbane Registry District. Within the Greater Metropolitan Area (10 miles radius) the like number and proportion was 1,610 and 25 per cent. respectively. Districts recording more than 200 deaths were—Charters Towers, 352; Moreton East, 264; Townsville, 261; Drayton and Toowoomba, 260; Rockhampton, 259; and Bundaberg, 218.

The following table shows the number of deaths, male and female, registered in each quarter of the year 1903:—

N.

	Males.	Females.	Persons.
First Quarter	1,252	760	2,012
Second Quarter	1,016	603	1,619
Third Quarter	871	505	1,376
Fourth Quarter	812	527	1,339
Totals	3,951	2,395	6,346

The mortality was very heavy during the first quarter of the year, when 2,012 deaths were registered. From January to June, inclusive, 3,631 or 57 per cent. of all deaths were recorded, the number and centesimal proportion in the second half of the year being 2,715 and 43 respectively.

Birthplaces of Persons who Died.

Table No. XIV. in the Appendix shows with full detail either the birthplace, or, with respect to coloured aliens, the race irrespective of birthplace, of the 6,346 persons who died during 1903. The following summary of this table compares the deaths and death rates, with ratios of each nationality, in the population at the last census:—

It was to be expected that persons born in Queensland, although the section comprising most of the fragile infant life, would show a favourable mortality experience, because it also includes the major portion of the older children and of young adults. In the population 57 of each 100 are Queensland born, but these only contributed 46 per cent. of all deaths. Those representing the old land are passing away, as persons from the United Kingdom contributed 25 per cent. of the population and 33 per cent. of the deaths. The same applies to Germans also, who numbered 2.64 of the population, and 4.11 of the deaths.

Occupations of Persons who Died.

By a reference to Table No. XIII. in the Appendix, information may be obtained as to the occupations of persons dying, so far as the same is recorded in the death registers. It would appear that 97 males and 21 females were engaged in one or other of the professions; 82 males and 154 females in the domestic class—*i.e.*, in the supply of board and lodging, or in paid personal service. The commercial class numbered 213 males and 8 females. In transport and communication 180 males were engaged. In industrial pursuits 671 males and 19 females. In production, such as agriculture, grazing, mining, &c., 1,066 males and 14 females. Indefinite and undefined, including pensioners, &c., 96 males and 137 females, whilst dependants numbered 1,546 males and 2,042 females. Of these 1,255 males and 1,942 females were dependent upon their natural guardians, and 291 males and 100 females were dependent upon public support, either as criminals or as inmates of charitable institutions.

Taking the four principal wage-earning classes, and comparing the ratios of the deaths in each to the total deaths during 1903, with similar ratios in the population as disclosed at the last census, and some interesting figures are presented.

The commercial class numbered 14 per cent. of the population, and contributed 10 per cent. of the deaths; transport, 11 per cent. of the population and 8 per cent. of the deaths, and so on.

Mortality of Metropolitan Area.

Nearly one-fourth of the population of the State is located within the metropolitan area. This large population, comprising a large number of infants, and loaded with the mortality of hospitals drawing patients from beyond the area, yet experienced a mortality rate but little in excess of that for the whole State. Details are furnished in the following table:—

Pa.

* The General and Children's Hospitals are in the City of Brisbane.

The rate within the Brisbane registry district, which consists of the two cities of Brisbane and South Brisbane, was slightly less in 1903 than in 1902—namely, 17.31 in the former, and 17.75 in the latter year. The death rate in 1903 for the whole metropolitan area is seen to have been 13.02 only. The death rates for the other capital cities of the Commonwealth for 1902, the most recent figures available, were—Sydney, 11.81; Melbourne, 14.93; Adelaide, 13.83; Perth, 18.44; Hobart, 14.99.

The effect on the death rate of the metropolitan area, resulting from mortality in public institutions situated therein, may be gathered from the following table:—

Last year 491 deaths occurred in one or other of these institutions, 287 males and 204 females, many of which were no doubt contributed from populations outside the area.

Child Mortality.

A distinct improvement has taken place in recent years with respect to the mortality of children, but so long as the deaths amongst infants range from eight to nine times as numerous as with the total population it is quite patent that much remains to be done.

Although the risks of infancy extend well to the end of the second year, yet the deaths under 1 year are for the most part accepted as indicating infant mortality, chiefly perhaps because the births offer a ready and fairly accurate population by which to gauge the death rate. The true infantile mortality, or the centesimal proportion of deaths under 1 year to the births for that year, are given for 10 years in the following table:—

Q.

Showing True Infantile Mortality.—Return for Ten Years 1894-1903.

1894.	1895.	1896.	1897.	1898.	1899.	1900.	1901.	1902.	1903.	Mean for the 10 years.
9·79	9·12	10·46	9·46	11·05	10·94	9·84	10·19	10·02	11·99	10·26

The rate last year, 11.99, was greater than that for any other year of the decade, partly due to the few births recorded in 1903; the nearest approach to it was in 1898, when 11.05 was recorded. The mean for the decennium was 10.26, or 1.73 below last year's rate. The latter, however, was considerably below the average rates for the various decades prior to 1890, as will be seen from the following statement:—

Qa.

The mean decennial rate, quoted at quinquennial periods since 1875, was as follows:—

1875	12·46	1895	11·07
1880	12·98	1900	10·31
1885	13·64	1903	10·26
1890	12·65		

The mean for the decennium ending 1903 was below that of any shown.

The following are the ratios of true infant mortality for 1903 in each of the States of Australasia:—

Qb.

Queensland	11·99
New South Wales	11·04
Victoria	10·64
South Australia	9·73
Western Australia	14·12

Passing from the consideration of infant mortality exclusively, to that of all children under five years of age, it is seen that during the first two years of life the prospects of surviving are much below that of the total population, but after the second year an improvement in this respect is apparent. The following table compares for each of the registry districts containing the principal towns, the ratios of deaths of children under 2 and 5 years of age to the total deaths and to the population ratios of the same ages respectively:—

In the districts given in the table, children under 2 years of age contribute 5 per cent. of the population, and 29 per cent. of the deaths; and children under 5 years of age contribute 13 per cent. of the population, and 33 per cent. of the deaths.

If children between 1 and 2 years of age and between 2 and 5 years of age be considered, the ratios are for the former 2.5 and 5.0, and for the latter 7.5 and 4.0.

On comparing the individual districts it is seen that the Enoggera experience exhibits a very high degree of child mortality, for children under 5 the death ratio is about five times that of the population ratio. Mount Morgan and Kennedy come next, the death ratios of children of the same age exceeding the population ratios by 3½ and 3 times respectively. These are both mining districts, where the death rate amongst children is invariably high. The mining district of Gympie and the quasi-mining district of Ipswich stand in this respect with a slightly higher death rate than the remaining districts, although about normal as regards the ratio for the whole State.

The death rates—*i.e.*, the deaths per 1,000 of the mean population for the whole of Queensland at each age period or group—are given in the following table :—

In 1902 the death rate under 1 year was 107.46, whilst last year it had increased to 114.38, whilst the rate for under five advanced from 28.45 in 1902 to 32.63 in 1903. The number of old people dying in 1903 was also much greater than in the previous year, the rates for the persons over 75 years of age being 136.27 in 1902 against 162.51 in 1903.

DEATH INDEX.

Attention has already been drawn to the fact that the age condition of the Queensland population was favourable to the mortality. The International Conference of Statisticians sitting in Europe, recognising the effect that the ages of the people had on the death rate, decided to request all statistical offices to publish annually a death rate, adjusted as regards age condition to a common factor, and selected Sweden as the model, it being considered that this country possessed conditions nearest to normal in this respect. The following table gives for Queensland the result of this computation for 1903 :—

Ra.

If the age condition in Queensland were similar to that of Sweden, with the ratio of deaths at each age, as it was last year, then the death rate instead of being 12.38 would have been 16.16.

The following table gives the deaths at different ages or groups of ages for each year since 1860 :—

Causes of Death.

The Registrar-General of England having adopted a modified form of the Bertillon scheme of classification, it was decided at last year's Statistical Conference that the Australian States should use the same for the 1903 compilation. The classification for 1903 is not therefore strictly comparable with previous years, but the following table shows the new and old schemes in juxtaposition.

The first five classes of the old scheme correspond to Class I. of the new. Class II. of the latter represents Class VI. of the old, and Classes VII. of the old and V. of the new are synonymous.

Full particulars as to the different causes of death, with the numbers due to each by sex, ages, months, and districts are contained in tables in the Appendix Nos. XVI. to XXVI. The ages tables, however, so as to confine them to one page, give no particulars as to age after 75 years. The following table amplifies the information on this point:—

There were 450 deaths registered during 1903 of persons over 75 years of age—292 males and 158 females. This was 72 more than in 1902, when 216 males and 162 females and 378 persons died upwards of that age. Of the 450 deaths during 1903 there were 108 certified as due to old age, without the assignment of any more definite cause. This is a much larger proportion of the total deaths over 75 than was so indefinitely defined in the previous year, the centesimal ratios being 18.0 in 1902 and 24.0 last year. Of definite causes endocarditis, valvular disease, was the most fatal, with 38 deaths, followed by bronchitis with 29, and heart disease (not particularised), 24.

The following statement extends the quinquennial grouping which is carried up to 75 years of age only in the Appendix tables No. XVI. *et seq.*:—

Of persons who attained 75 years of age in 1903, nearly one-half, or 47 per cent., died before reaching fourscore; 36 per cent. between 80 and 85; 13 per cent. between the latter age and 90; and 3 per cent. between 90 and 95; only four persons exceeded the latter age, two of them passing the great age of 100 years; one, a male, attained the age of 103; and one, a female, that of 101.

Table XV. in the Appendix gives the number of deaths from each cause, arranged in the order of their degree of fatality.

The following statement supplements, with respect to the sixteen most fatal causes, the particulars for last year given in the table above referred to:—

Gastro-Enteritis.—This complaint, so fatal to young children, has taken the place at the head of the mortality lists so long occupied by phthisis. There were 433 deaths due to this complaint last year, this figure representing 6.8 per cent. of all deaths, and 8.4 per 10,000 of the mean population. In 1902 and previous years, under the designation "enteritis" was classed inflammation of all the intestines, including gastro-enteritis. These are now divided into enteritis (not epidemic), gastro-enteritis, appendicitis, and perityphlitis; these together numbered 489 in 1902 and 623 last year, an increase of 134.

Phthisis stands next in order, with 295 deaths in 1903. Under the old classification this term embraced tuberculosis of the pulmonary and laryngeal organs, and in 1902 numbered 458 deaths. The corresponding causes for 1903 were phthisis (as above given), with 295 deaths; and tuberculous phthisis, pulmonary tuberculosis, with 107 deaths, or, together, 402, a decrease of 56 deaths. The following table, which compares for 10 years the deaths due to phthisis, of necessity includes deaths from both these causes as given in the new classification:—

It has been frequently supposed that these complaints are largely contributed to by imported cases. There is nothing in the above table to justify the conclusion that this is so to any considerable extent. The 12 cases dying within the first 6 months of residence, or even the whole 18 deaths within 1 year of entering the State, may have been introduced, but even this is by no means certain, as tuberculosis at times takes a very rapid course. The majority of the deaths were of persons who had been at least 10 years in Queensland at the time of their death.

A similar table with respect to all other tuberculous diseases is appended:—

Children, when attacked by tuberculosis, usually exhibit the complaint in connection with the alimentary canal, rather than with the respiratory system, consequently the deaths recorded in the earlier columns of the table consist chiefly of young children who, of necessity, have been only a short time in the State although for the most part born there.

Pneumonia (not particularised).—There were 256 deaths due to this cause, which was just over 4 per cent. of the total deaths, and 5 to each 10,000 of the mean population. As under the new scheme of classification this complaint has been divided under four heads, comparison with the experience of the previous year is only possible by amalgamating these. Pneumonia of all kinds caused 355 deaths in 1903 and 454 in 1902, or a decrease last year of 99.

Valvular Disease, Endocarditis (not infective).—Of the 227 deaths due to this complaint last year, 150 were males, and only 77 were females. This is 9 more than in 1902, when 218 were contributed by this cause. In that year also males greatly predominated, though to a less extent than in 1903. In the latter year deaths from valvular disease, &c., formed 3.58 per cent. of all deaths and 4.4 per 10,000 of the mean population.

Diarrhœa (not epidemic) caused 193 deaths in 1903, which was practically the same number as in 1902. This is equal to 3 per cent. of the total deaths and 3.8 per 10,000 of the mean population.

Enteric Fever (more frequently spoken of as typhoid) contributed 189 to the death roll last year This was 56 more than in the previous year, when 133 deaths from this cause were recorded. Males are more subject to the attacks of this fever than females, being more frequently exposed to infection. There were 114 male and 75 female deaths due to enteric fever in 1903. Of the 189 deaths 27, or 14 per cent. only, were recorded within the metropolitan area, although embracing 24 per cent. of the population. The deaths from typhoid have been generally distributed throughout the State, a number of cases occurring in the far west, no doubt due to the rain following on the prolonged drought. The following districts were the principal contributors:—Kennedy, 23; Townsville, 19; Bundaberg, Rockhampton, and Warwick, 11 each.

Old Age.—This term now embraces senile decay, and numbered 185 deaths in 1903 against 124 in 1902. Although most indefinite and unsatisfactory as a cause of death, yet undoubtedly in some instances the failure of strength is so gradual and so general that it is impossible to attribute the decease to any specific disease or to say that any one organ failed sooner than another; but still it is to be feared that in some instances more definite particulars could be procured if sufficient trouble were taken.

Bright's Disease increased from 169 in 1902 to 180 last year. Of the latter 114 were of males and 66 of females.

Convulsions.—Another indefinite and unsatisfactory cause returned too frequently as accounting for the death of young children. A symptom only, and not a disease, it was given in 1903 as the cause of 177 deaths, of which 99 were of males and 78 were of females, all under 5 years of age. There were 174 deaths so returned in 1902, so that the increase last year was 3 only, pointing to an improvement in diagnosis, in view of the greater number of deaths registered in the latter year.

Premature Birth.—The 171 deaths ascribed to this cause showed a marked decrease of 37 over the figures for 1902, when 208 deaths were so returned.

Bronchitis, which caused the death of 85 males, 70 females, or 155 persons last year, is not frequently fatal to people in the prime of life, but is a prevalent cause of mortality with both young and old; only 20 deaths were due to this cause of persons between 5 and 55 years of age, whilst 47 under 1 year and 29 over 75 years of age succumbed to the disease.

Malignant Disease, Cancer.—147 deaths were recorded to these causes in 1903; but for purposes of comparison with previous years, and also to arrive at the true mortality, the whole of the sub-class under the new classification must be considered. These comprise carcinoma, sarcoma, and malignant disease, cancer, and they cover the ground embraced under cancer in the old classification. At the request of members of the medical profession, and in compliance with the decision of the Statistical Conference, a special table, indicating the part of the body affected with these complaints, and the age of the sufferers, is inserted.

The most frequent seat of attack with both men and women is the stomach; 55, or 22 per cent., of all deaths from carcinoma, &c., were in 1903 located in that organ. Passing a few cases of sarcoma in the very young, carcinoma is very rare before the 15th year, and does not become frequent until the climacteric age of 35; thereafter the mortality gradually increases until about 60 years of age.

Childbirth.—There were 58 deaths due to child-bearing last year, and for the purpose of showing relative risks attending first or subsequent confinements the following table has been prepared:—

These particulars relate to the 51 cases in which married women succumbed, the information relating to previous issue showing whether the mother died as a result of the first, second, or third, &c., confinement. Thus 14 were cases of primiparæ, 4 were at the second confinement, and so on. The youngest mother was 17 years of age, and the oldest 46.

MARINE REGISTRATIONS.

There were only four entries recorded during 1903 in registers kept for the record of births and deaths occurring at sea whilst voyaging to Queensland. These registrations consisted of deaths only, as follow:—"Tyrian," 1 male; ship "Ladstock," 2 males; and the barque "Golden Gate," 1 male.

ADDITIONS TO REGISTERS.

The additions of names to the Birth, Marriage, and Death Registers last year numbered 24,833, or 2,073 fewer than in 1902. The total number of names on the registers at the end of 1903 was 760,915.

REGISTRY OFFICE, RECEIPTS AND EXPENDITURE.

Most of the district registrars also served the Crown in some other capacity, in which case they were paid at the rate of 1s. 6d. per entry, the payment for any one year not to exceed £15. Some registrars holding that position only are salaried officers. In these cases all fees for marriages, searches, &c., are paid to the Consolidated Revenue.

Registrars holding no other office, and not receiving a specific salary, were paid by fees at the rate of 3s. for each entry, and retained for their own use all fees from the public except those for the late registration of a birth. The following table compares for the past two years the amounts received as fees which were payable to Revenue, and paid in accordingly:—

INFANTILE MORTALITY, AND ITS PROPORTION TO MEAN POPULATION, ITS INCREASE OR DECREASE, NUMERICAL AND CENTESIMAL. — MARRIAGES, THEIR INCREASE OR DECREASE, NUMERICAL AND CENTESIMAL, AND THEIR PROPORTION TO MEAN POPULATION OF EACH YEAR.

YEAR.	Number of Deaths under 1 year.	Below 2 years of age.	2 and under 5 years of age.	Total below 5 years of age.	Numerical Increase or Decrease† in Deaths of Children below 5 years of age.	Centesimal Increase or Decrease† in Deaths of Children below 5 years of age.	Centesimal Proportion Deaths of Children below 5 years of age bear to the total Deaths of each year.	Centesimal Proportion Deaths of Children below 5 years of age bear to Mean Population of each year.	Centesimal Proportion Deaths of Children under 1 year to Total Births, showing true infantile mortality.	Church, or Registry Office: Church of England.	Church of Rome.	Presbyterian.	Methodist: Wesleyan Methodist.	Methodist: Primitive Methodist.	Methodist: United Methodist.	Methodist: Bible Christian.	Congregational.	Baptist.	Lutheran.	Other Denominations.	Registration and Justices, Marrying Acts.	Total Marriages.	Numerical Increase or Decrease† in Total Marriages.	Centesimal Increase or Decrease† in Total Marriages.	Centesimal proportion total Marriages bear to Mean Population of each year.

* Excess of Arrivals over Departures ; Complete figures not available.

‡ This estimate exceeded the Population, as ascertained by the Census taken on 3rd April, 1881, by 8,891 Males, 3,661 Females, or 12,552 Persons ; the estimate has therefore been corrected by taking the Census Population with 1½ per cent. added for non-collection as the basis, and deducting therefrom the increase by excess of Births over Deaths and excess of Arrivals over Departures by Sea between the 1st January and 3rd of April, 1881, which gives the corrected estimate marked §.

‖ This estimate exceeded the Population, as ascertained by the Census taken on the 1st May, 1886, by 1,106 Males, 2,957 Females, or 4,063 Persons ; the estimate has therefore been corrected by taking the Census Population with 2½ per cent. added for non-collection as the basis, and deducting therefrom the increase by excess of Births over Deaths and excess of Arrivals over Departures by Sea between the 1st January and the 1st of May, 1886, which gives the corrected estimate marked ¶.

‡‡ This estimate exceeded the Population, as ascertained by the Census taken on the 5th April, 1891, by 11,368 Males, 1,078 Females, or 12,446 Persons ; the estimate has therefore been corrected by taking the Census Population with 2½ per cent. added for non-collection as the basis, and deducting therefrom the increase by excess of Births over Deaths and excess of Arrivals over Departures by Sea and by Rail between the 1st January and the 5th April, 1891, which gives the corrected estimate marked §§.
